

HERO
HYBRID GRASS

A REVOLUTION IN NEW HYBRID GRASS TECHNOLOGY

Protected by Australian patent no 2016291546.
US patent application no 15/267,267 and other patents pending.

In February 2017, **HERO HYBRID GRASS** was installed on golf walkways at Kingsbarns Golf Links, Scotland. The area was closely monitored in situ for six months and the aim was to ensure that HERO was established as the surface of choice for golf walkways.

During the course of these six months at least 40,000 people walked along the HERO walkway. As the photos opposite demonstrate, from the moment of installation right through to today the system was hugely successful and the quality of green coverage was maintained throughout the area. The **HERO HYBRID GRASS** combines natural grass with synthetic fibres that are visible on the playing surface.

HERO HYBRID GRASS is a system that is ideally suited to golf walkways. This is due to the unique design of the grid. The open grid composition enables you to be able to work with the HERO surface whilst it is in play, using invasive techniques that would not usually be possible with a matted hybrid system, such as:

- > Verti-draining
- > Procore
- > Disc Seeding

The unique open grid structure ensures that the system will not be damaged by the tines needed for this maintenance. Dramatically increasing the longevity of the walkways. But don't just take our word for it:

'This has been an exceptionally busy year for us, in fact it's our busiest ever! Adding to that we also hosted the RICOH Women's British Open early August & the Alfred Dunhill Links Championship early October, so maintaining pathways proved to be a massive challenge.

We had exhausted most options open to us with little or no success. That was however until we tried the new innovative system of **HERO HYBRID GRASS** and here we have found the solution.

With one season now drawing to the end, the coverage and stability of this system is second to none and from my involvement this past year, this system is the answer. I therefore would highly recommend **HERO HYBRID GRASS** to other clubs that are in a similar position/ facing the same challenge as we did'.
